## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, an illuminated electrical plug adapter- classified in Class 362, Sub class 95; and
- II. Claims 5 and 6, an illuminating module- classified in Class 363, Sub-class 146; and

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions. In the instant case, the illuminating electric plug adapter of Invention I, and the illuminating module of Invention II – are not disclosed as capable of to be used together. Further, the illuminating electrical plug adapter needs to be engaged with an electrical plug for its operational use, whereas, the claimed illuminating module does not require operational support from other devices for its intended use. Therefore, inventions I and II have different mode of operations.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

2. During a telephone conversation with the applicant, Mr. James M. Stoddard, on July 29, 2005, a provisional election was made without traverse to prosecute the invention of Invention I, claims 1-4. Affirmation of this election must be made by applicant in replying to this Office action. Claims 5 and 6 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.
